

DeForest Area School District

Building Our Future Together

Construction Update | November 1, 2016

Our Progress | Calendar of Events | Questions/Comments

Below are updates for **Eagle Point Elementary School** and **Windsor Elementary School** as we move through the phases of construction and grand openings!

Eagle Point Elementary School

October 28th update from Findorff Project Manager, Aaron Zutz

The Wisconsin fall colors are not the only thing turning red in DeForest. The red nichiha panels have really taken off at Eagle Point. One of the three penthouses is more than half way done. The north side parking lot is being laid with blacktop, while the east side is getting started with curbs and sidewalks. The art and kindergarten interiors have been started with drywall, in addition to painting getting started.

More, including photos and what's coming up in the weeks ahead.

"Did you know?"

More than 90% of parking areas in the United States are surfaced with asphalt pavement. One of the biggest advantages for asphalt parking lots in the Northern United States is that black surface helps to melt snow and ice during the winter time. If you placed all of the asphalt used in the United States for roads and parking lots in a single location, it would cover the whole state of Wisconsin.

Windsor Elementary School

October 21st update from Findorff Project Manager, Sara Michalski

Bright colors have continued on site at Windsor. More nichia panels have been added around the gym, painting has started in the second resource area, and the site has been finishing up the sidewalks and blacktops. The lights have started to be installed along with the ceiling grid for the ceiling tile.

[More](#), including photos and what's coming up in the weeks ahead.

"Did you Know?"

Painting the walls certain colors can affect your mood depending on the color. Purple is a rich and dramatic color that is associated with creativity. Blue tends to be a color that makes the mind feel calm or tranquil and is associated with the most productivity being done. The color yellow can make the mind feel enjoyment and happiness, linked to making people feel energized and uplifted.
