

Design & Construction UPDATE

DeForest Area School District

Supporting Growth. Advancing Education. August 2019

Throughout the summer, District staff have been working closely with the EUA and Findorff design and construction team on the renovation and expansion of DeForest Area High School. Today, we're excited to show you the results of that hard work. The team is nearing completion of the high school schematic design, the first phase of the design process. It is important to remember that the floor plans and exterior renderings are conceptual images, not completed designs. It is likely that these plans will evolve over time as the design and construction team continues to gather feedback from staff to further develop plans and ensure budgetary alignment.

Floor Plan - Level 1 (draft)

Exterior Aerial View Concept (draft)

Larger images are available on the DASDConstruction.org website.

Project Schedule

NEW INTERMEDIATE SCHOOL

Design

Spring 2019 – Spring 2020

Construction

Spring 2020 – Summer 2021

HIGH SCHOOL

Design

Spring 2019 – Spring 2020

Construction

Summer 2020 – Summer 2022

YAHARA ELEMENTARY SCHOOL

Design

Fall 2019 – Winter 2020

Construction

Spring 2020 – Summer 2020

MIDDLE SCHOOL

Design

Winter 2019 – Spring 2020

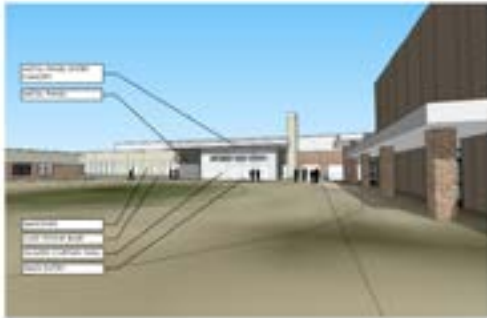

Construction

Summer 2021 – Winter 2021

More information

Additional details for the images at left are available on the DASD Construction website: www.DASDconstruction.org

High School Main Entry Concept (draft)

High School Pool Entry Concept (draft)

The renovated and expanded high school will include:

- Enlarged student commons and cafeteria to accommodate growing enrollment
- Renovated science wing with new classroom, laboratory space
- Renovated library with integrated media lab and small group instruction spaces
- Renovated large group instruction area (LGI)
- New three-station gymnasium
- New pool with locker room facilities, spectator seating, and public access
- And more

Intermediate School Update

The schematic design process at the Intermediate School was completed this summer and the design team is now translating conceptual ideas into specific details. DASD teaching staff will again provide input into this next stage of design. The EUA design team is working closely with district staff and engineering consultants to design structural, mechanical, electrical, plumbing, and fire protection systems. Details such as cabinetry, fixtures and material selections are being discussed. Construction systems and methods are reviewed with the construction manager to ensure budgetary alignment and interior details are vetted with district staff.

Other Projects

The design phase for **Yahara Elementary School** will begin at the end of this month, and the **Middle School/District Office** project will begin this winter.
